

Dear Friend,

Animals have always been a big part of my life, but over the years, the part they have played has certainly changed. I was raised on a farm, and animals took a decidedly "service" role. Dogs were for hunting companions, cattle raised for food, and chickens to give grandma a reason to get home. But, then my life changed as I grew up, became a chiropractor, and married my wife, Janna. You see, Janna is a huge animal lover. All creatures great and small - you know the type. In her family, animals were family members. So, with Janna came rabbits, rats, dogs, cats, turtles, hamsters, guinea pigs, and if it were up to her, the list would include, chickens, goats, horses, ferrets . . . and on and on.

B.E.S.T., of course, has been the health care of choice for all of our human family members for a very long time. But, when our pets had something wrong, Janna just took them to the vet. But, when our greatly loved family cat got seriously hurt in an accident, and the vet was at a loss, our desperation led me to using B.E.S.T. It's funny to me now, that I never thought of using B.E.S.T. on our pets before that time, because I certainly know the power of the procedure. Alas, the injuries were too severe, and the effort was too little, too late, but the whole incident, as painful as it was, was a lesson, and happened for a very important reason.

In the memory of Snowflake, we opened our minds, hearts, and schedule to the development of Animal B.E.S.T. And, when that happened, Julie and Greg Montgomery came into our lives. It's just so wonderful how this all works! They have been practicing their own interpretation of B.E.S.T. for animals for some time now, as have many of you. So now, with the help of Dr. Morter and all of his knowledge and inspiration, we have taken everything that works 100% of the time, deciphered and interpreted the processes to fit the different species, and translated it all into these amazing procedures - Animal B.E.S.T. Level I Certification and Level II Certification.

And so, it is my distinct pleasure to introduce you to Animal B.E.S.T. May it enrich your life as you become a loving, balancing, health-giving steward to the animal kingdom.

### Animal B.E.S.T. Gives Your Furry Friend:

- Increased Immunity
- Pain Relief
- Behavior Stability
- Stimulated Cellular and Tissue Repair
- Increased Performance
